BENNINGTON (WP7581-WP7587)

PAPERWEAVE

The Holland & Sherry paper weaves are our interpretation of a traditional, centuries-old Japanese weaving technique. The patterns were chosen to reflect the tailored look of our fabrics, while still emphasizing heritage and artisanship – two concepts that are synonymous with our brand. The balance of warp and weft in this particular weaving process nicely disguises the seaming between panels, in contrast with other natural wallcovering products that have a prominent paneling effect. The dyes used to create the paper weave collection are solely water based and contain no volatile organic compounds.

- Composition: Cellulose with Paper Backing
- Width: 36" (91 cm)
- Panel Length: 8 yard roll
- Minimum Order: 2 rolls
- Lead Time: In stock 2-3 weeks*
- Fire Rating: ASTM E84 Class A

**Inquire to confirm stock. Stock levels do occasionally run low and lead times for new production can increase anticipated delivery date.*

CLEANING & CARE INSTRUCTIONS

Wallcovering can be cleaned using a soft brush attachment of a vacuum. Spots should be removed by using a soft gum eraser or should be picked free with a sharp instrument. Water should not be applied at any time for cleaning.

Paper Weave use in a bathroom: if you have a bathroom with a shower or tub that doesn't remove humidity well, or a wall close to a toilet in a half bath, the installation of paper weaves should be avoided.

DISCLAIMER

Our natural wallcoverings are handmade; small color and fiber variations may occur. These are not considered flaws but beautiful and inherent characteristics of the product.

All wallcoverings ship with untrimmed edges and must be trimmed on-site for crisp seams. Please inspect goods thoroughly before cutting as no allowances will be made on trimmed wall covering. Absolutely no claims will be accepted for labor or any other incidental costs.
