ARCADIAN (LE5328-LE5339)

PRODUCT SPECIFICATIONS

Arcadian is a distressed, aniline-dyed leather that is treated with mineral oils to showcase the natural beauty of the grain. This treatment reveals, rather than disguises, the natural characteristics of the hide (e.g. scratches and nicks). Pressure can be applied to the surface of the hide to rub back or dissipate some of the topical scuffs and abrasions. This "pull-up" leather will patina beautifully, and by nature, will lighten and darken with use. That being said, a final protective topcoat layer seals in the richness of color. This leather is suitable for all residential and light contract applications, and specifically for clients who appreciate the natural aging process of leather. Please note that there will be some subtle variation of color, tone and surface texture within a hide and from hide to hide even within the same dye lot.

- Average Hide Size: 50-55 SF
- Minimum: Half Hide
- Raw Material: European Cowhide
- Leather Type: Full Grain
- Tannage: Chrome Tanning
- Dyeing: Aniline
- Finish: Two-Tone Pull-Up with Paraffin
- Average Thickness: 1.0 mm - 1.1 mm
- Lead Time: Typically stocked; please confirm current stock availability with your sales representative.

DURABILITY

- Light Fastness: ISO 105-B02: Blue Wool Scale ≥ 3
- Flammability: NFPA 260: Class 1; CAL TB117–2013

CLEANING & CARE INSTRUCTIONS

Occasionally dust with a soft, dry cloth. Blot spills immediately — never rub. If cleaning is required, use a pH-balanced cleaner made for semi-aniline or pigmented leather, applied with a soft cloth in gentle circular motions. Never use alcohol, bleach, acetone, baby wipes, or household cleaners, as these strip the protective topcoat. For deep stains, ink, or significant discoloration, consult a professional leather cleaner.
