ARBOR (LE5317-LE5327)

PRODUCT SPECIFICATIONS

Arbor is a full-grain Italian leather made with the finest European bull hides. Its naturally smooth texture is carefully finished with a light, variable color treatment for a subtle semi-matte sheen. Arbor is vegetable re-tanned, giving it firmness and tightness for strength. In addition, the surface of the hide is treated with a powerful stain and wear resistant layer. This product is great for any indoor application – both residential and commercial.

- Average Hide Size: 50-55 SF
- Minimum: Half Hide
- Raw Material: European Cowhide
- Leather Type: Full Grain
- Tannage: Chrome Tanning
- Dyeing: Aniline through dyeing

- Light Fastness: ASTM D7255: CS10 Taber Wheel 500 Cycles/500gram weight
- Flammability: NFPA 260: Class 1, CAL TB117–2013, IMO 2010 FTP Part 8 (A.652 (16))

CLEANING & CARE INSTRUCTIONS

Dust regularly with a soft and dry cloth. Occasional dusting with a dry cloth should be all that is necessary to clean and maintain it. For stains on our more protected leathers like Arbor, dampen a clean cotton cloth and add a small amount of mild non-detergent cleanser. Gently wipe the area affected in small circles, so that the affected area is covered. Then rinse the excess soap from the cloth, wring dry so that it is damp, not soaking, and go over the area. Do not oversaturate the leather with water and use the least amount of soap possible. Do not rub the spot with force or pressure to avoid pushing the liquid into the leather. Do not apply commercial saddle soap, oils, or cleaners to the leather. These are not made for use on upholstery leather and can actually harm the leather.
